GESTUREHEAL DATABASE DUMP

Database: gestureheal
Generated: 2026-09-17T14:55:57.694Z

This document contains the exported contents of the MongoDB database, including all collections and documents available to the connected database user.

Collections:

- telemetries
- sessions
- users
- reports
- patients

COLLECTION: telemetries

Total documents: 0

This collection is empty.

COLLECTION: sessions

Total documents: 265

  "observations": "During Cloud Reach, the patient completed 6 successful reps from 9 total attempts, resulting in 67%
movement accuracy. The session recorded 2 missed reps and 1 incomplete reps. The longest successful streak was 4 reps.
Average movement smoothness was 71%. Average reach distance was 22.5 and maximum reach distance was 53.7. Average
shoulder ROM was 13.29° for the recorded Cloud Reach reps. No ROM target is configured, so ROM attainment remains N/A.
Consistency was 46%, indicating variability in repeatability across the recorded movements. The recorded facial pain
signal was 3/10 and average comfort was 7/10. Recorded maximum fatigue was 0%.",
